Profile Summary

Software Engineering student at NSBM Green University specializing in full-stack development. Proficient with React, Flutter, Java, and Git, and experienced in applying Agile/Scrum methodologies for project delivery. An effective collaborator with strong communication skills, adept at explaining technical concepts and working within team environments. Possesses a proven ability to solve complex challenges, demonstrated through the successful development and deployment of a full-stack e-commerce platform.

Work Experience

IT Support and Web Administrator

Oct 2020 - 2022

YH Waterproofing Solutions Pvt Ltd, Galle, Sri Lanka

- Directed the company's digital presence across the corporate webpage and all social media platforms, achieving a 35% increase in online engagement within one year.
- Enhanced operational effectiveness by providing comprehensive, company-wide IT support, resulting in a 20% faster resolution time for internal process issues.
- Led the redesign of the company website by engineering interactive front-end components with HTML, CSS, and JavaScript, boosting user engagement metrics by 25%.

Supervisor

Oct 2020 - 2021

Siyamart Parking Trees (Pvt) Ltd, Colombo 05, Sri Lanka

- Drove a 15% sustainable increase in team productivity by re-engineering over 5 core business workflows.
 - Led a team of 10 personnel to successfully meet all annual departmental goals through targeted coaching and mentorship.
 - Cut operational costs by 5% in one fiscal year by implementing strategic resource management, while upholding high standards of service quality.
-

Education

BSc. (Hons) in Software Engineering

Oct 2022 - present

NSBM green University, Homagama ,Sri Lanka

Projects

AI-based ChatBotBuilt

- Engineered a fully functional chatbot using Api and Dialogflow to automate customer service conversations.
- The system was designed to handle common user inquiries, successfully managing conversation flows and providing instant responses.

Full-Stack E-commerce Platform | MERN Stack

- Engineered a complete e-commerce platform utilizing the MERN stack (MongoDB, Express.js, React.js, and Node.js).
- Implemented core features including secure user authentication with JWT, a shopping cart, a product management dashboard, and order processing.

Library Management System | Java & SQL | Group Project

- Collaborated within a 6-person team to design and build a comprehensive system for managing library records using node.js and MySQL.
- Led the development of the back-end modules for book-lending and user record management, ensuring data integrity and efficient retrieval.

Hotel Website | HTML, CSS, PHP | Group Project

- As part of a 8-person team, constructed a website for a hotel booking system using HTML, CSS, and PHP.
- Spearheaded the back-end development, creating the core booking engine and integrating it with a MySQL database to manage real-time reservations.

Real-Time Auction Website | Group Project

- Collaborated within a six-person team to construct a web platform for live auctions, emphasizing a highly responsive user interface.
- My primary role involved coding the front-end bidding components using JavaScript, HTML, and CSS, and implementing a WebSocket-based timer for immediate bid updates.

Achievements

- **Python For Beginners** - University of Moratuwa
- **Web Design For Beginners** - University of Moratuwa
- **Frontend Web Couese** - Sololearn
